FLOWER KNIGHT DAKINI
CH. 10 - SPARKLE

FLOWER KNIGHT DAKINI
CH. 10 - SPARKLE

**KILL
THE
GOLEMS...**

**KILL THEM...
KILL THEM...**

**IF YOU
DON'T
FIGHT...**

**THAT'S
THE REASON
YOU WERE
BORN.**

**...THIS WORLD
FULL OF
TRAGEDY
WON'T BE
LIBERATED...**

**DON'T
LOOK
AROUND.
YOU DON'T
NEED ANY
OF THAT.**

**ONLY
THINK
ABOUT
KILLING
YOUR
ENEMY.**

**THAT'S
YOUR
MISSION.**

**THIS IS
YOUR
REASON
FOR
BEING.**

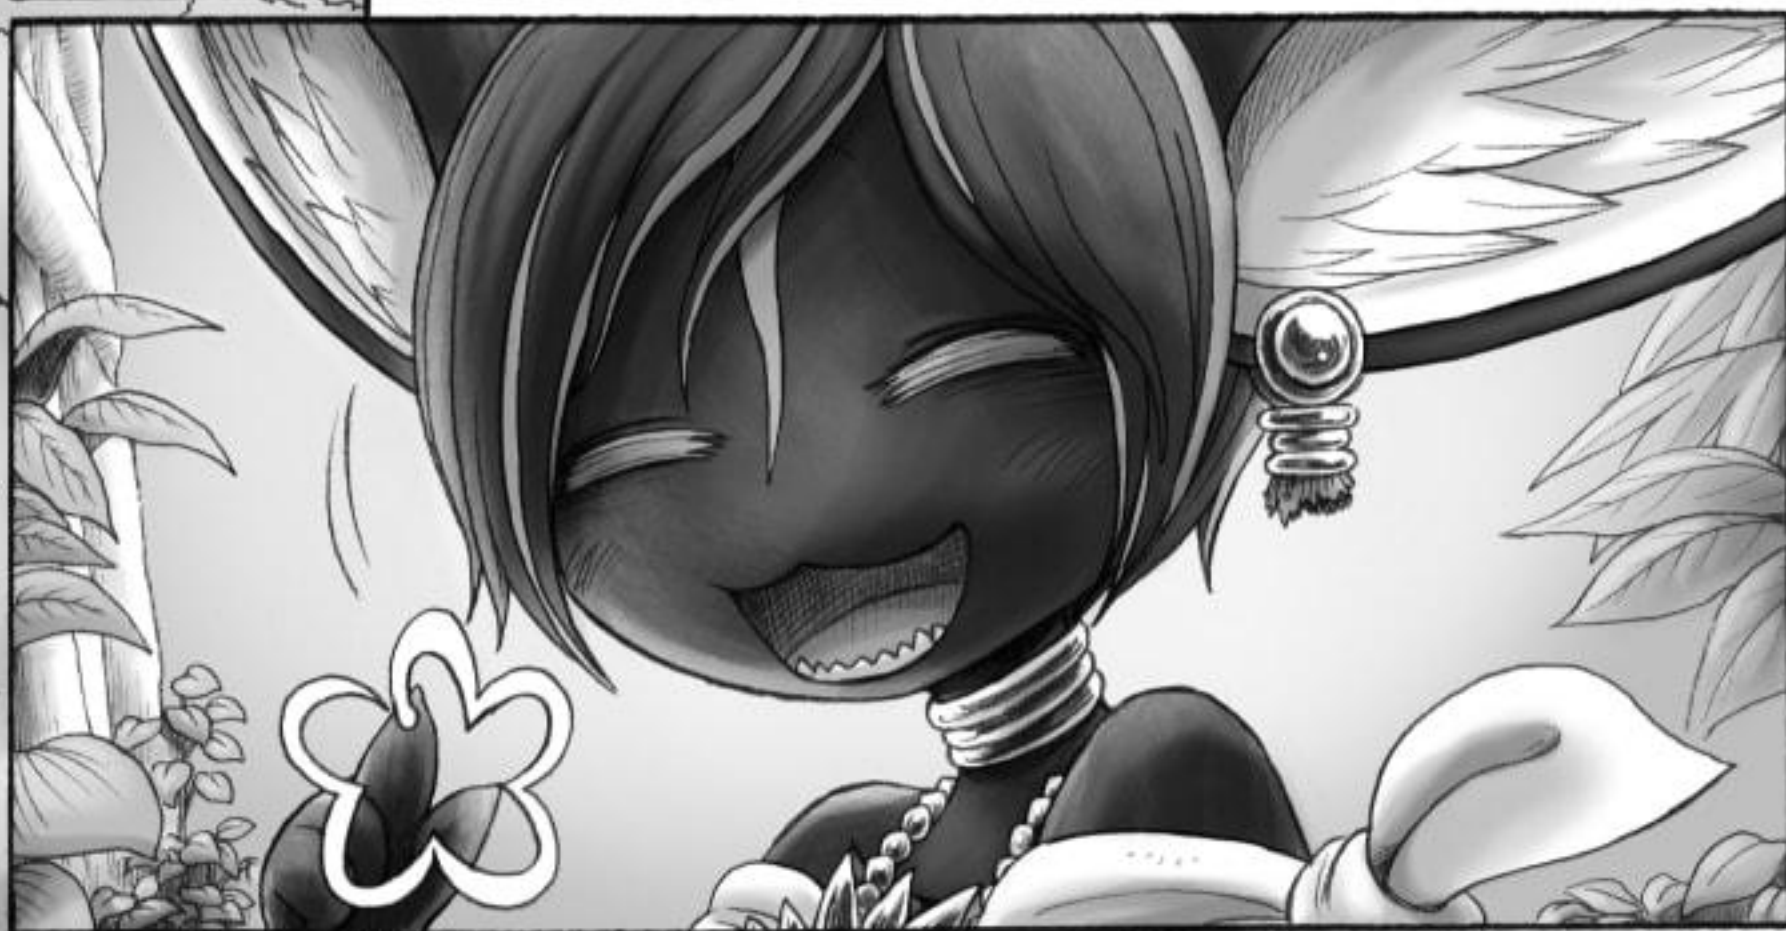

FIGHT.

YOU HAVE...

**...NO
OTHER
CHOICE
NOW...**

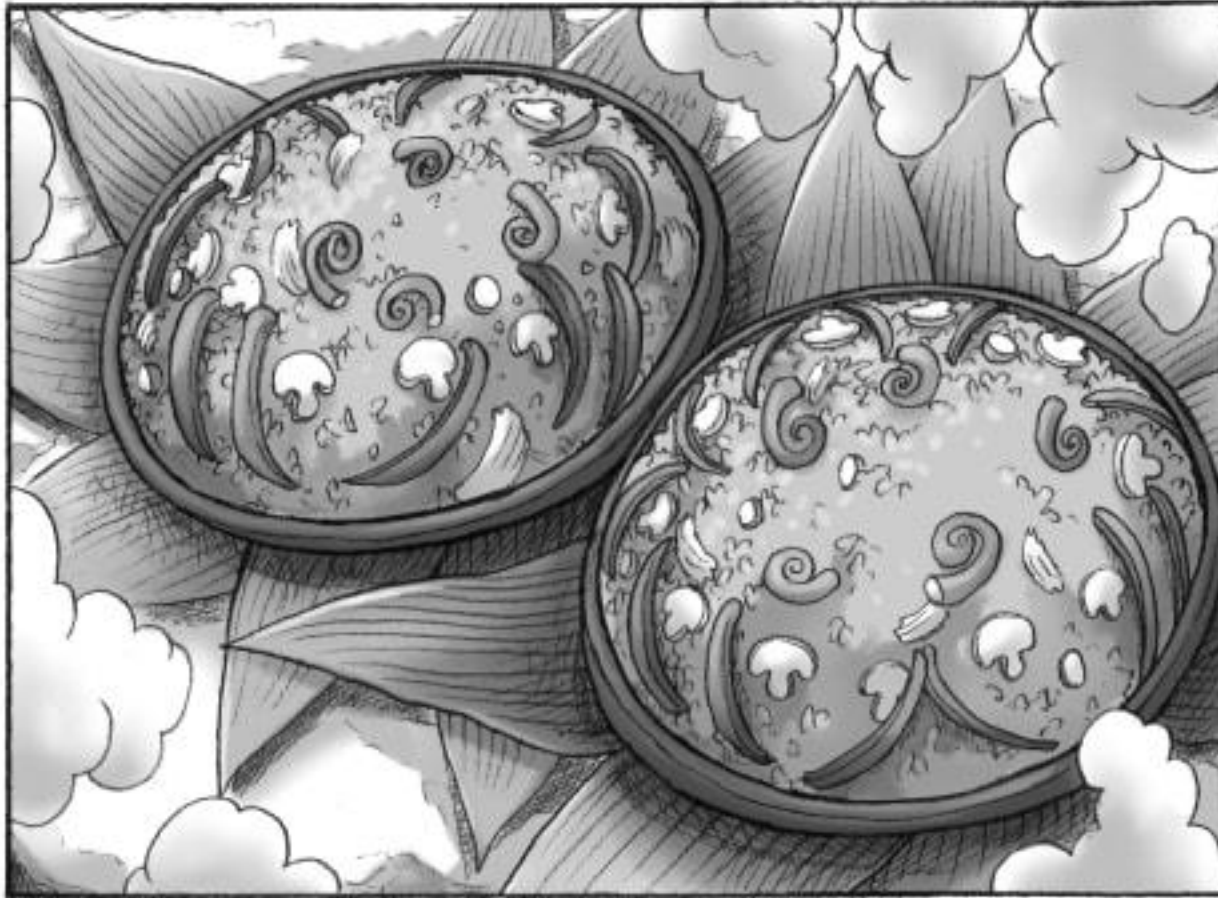

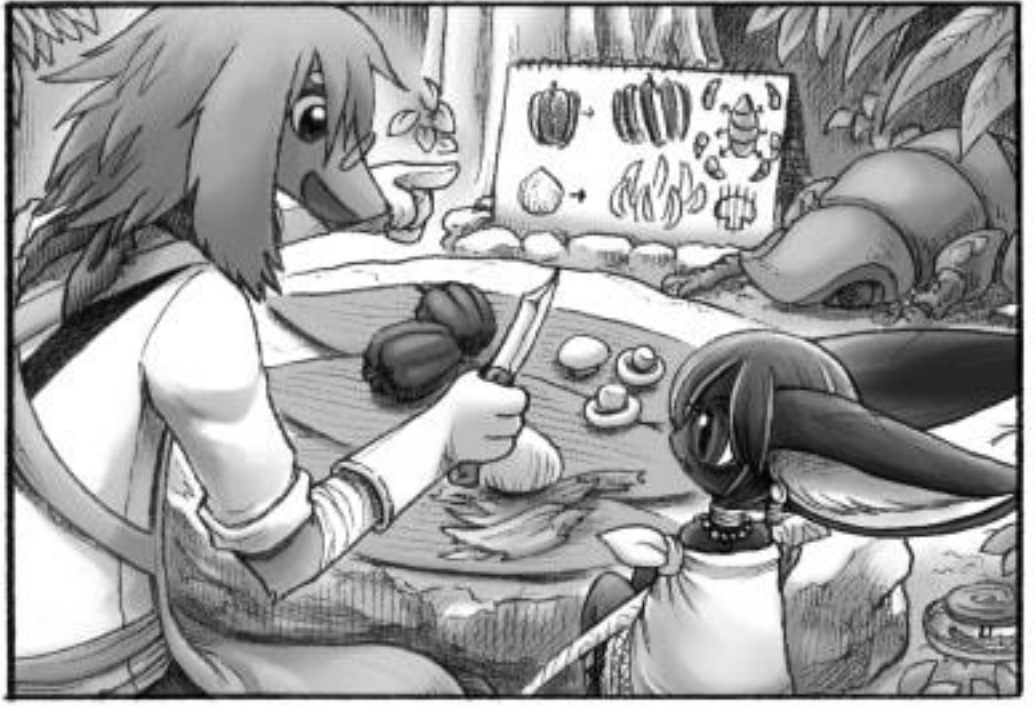

100KM (67MI) NORTH OF KARACUMA
HABITAT OF THE GIANT BEETLES

IMADEA TROPICAL RAINFOREST

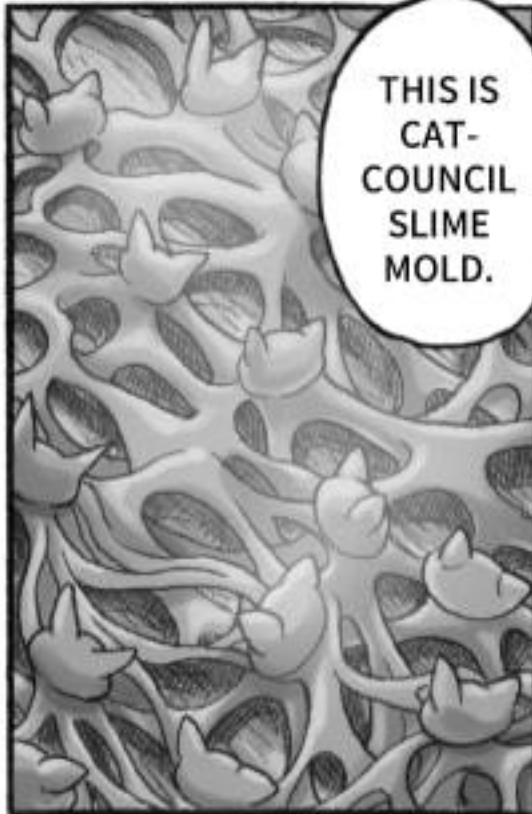

THAT'S
A SMALL-
SIZED
GIANT
BEETLE
CALLED
MOSS-
HUGGER.

OH! WELL
SPOTTED.
WE JUST
ATE ONE
OF THOSE.

THEY'RE
CALLED
FRESH-
WATER
CROWN
SQUID.

THIS IS
CAT-
COUNCIL
SLIME
MOLD.

THAT'S
A POOL
OF
WATER.

OH!
THAT'S
CALLED
THIN-LEAVED
KALANCHOE,
I THINK.

HM?
WHAT'S
NEXT?

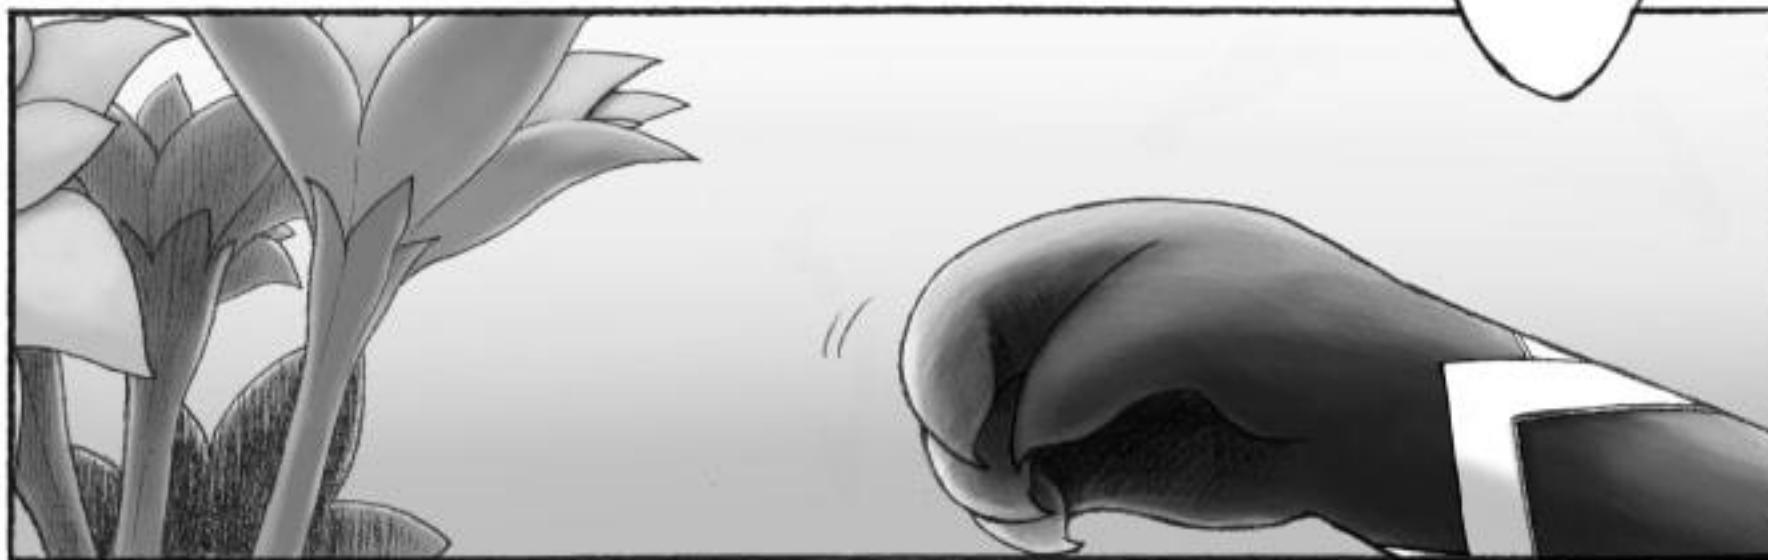

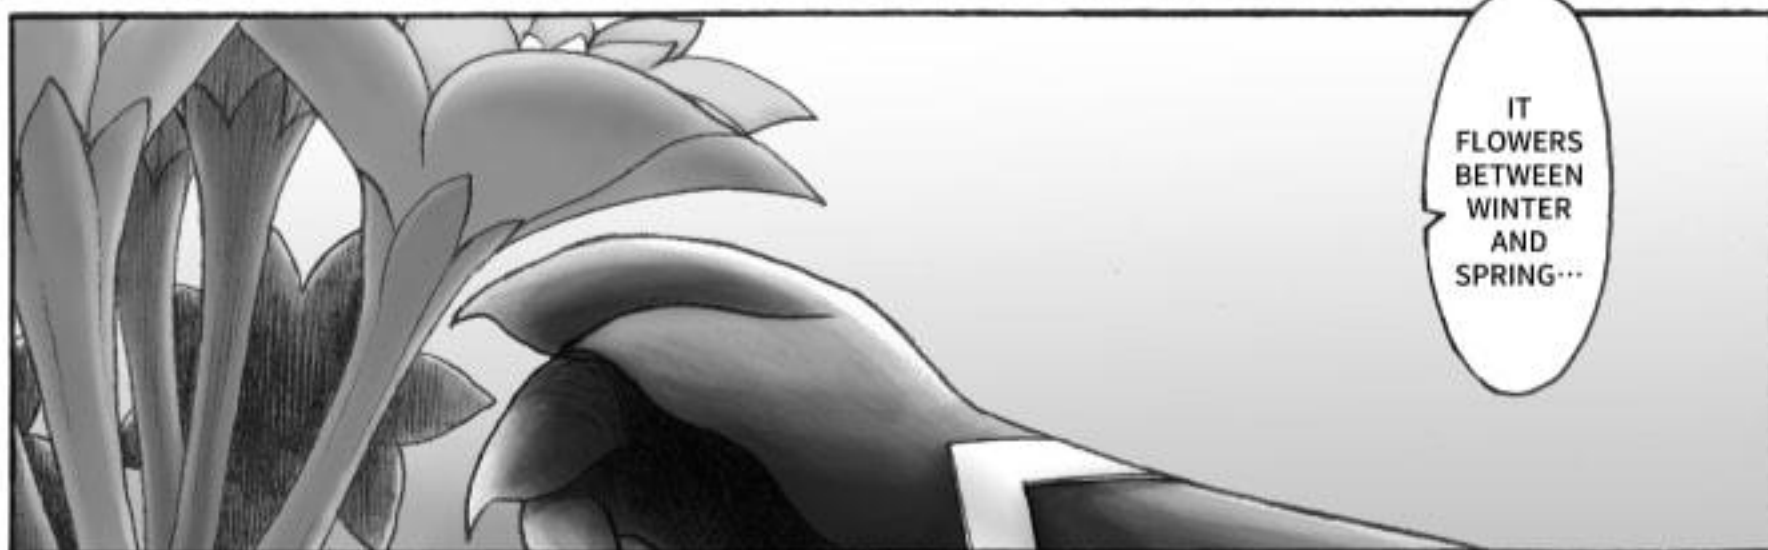

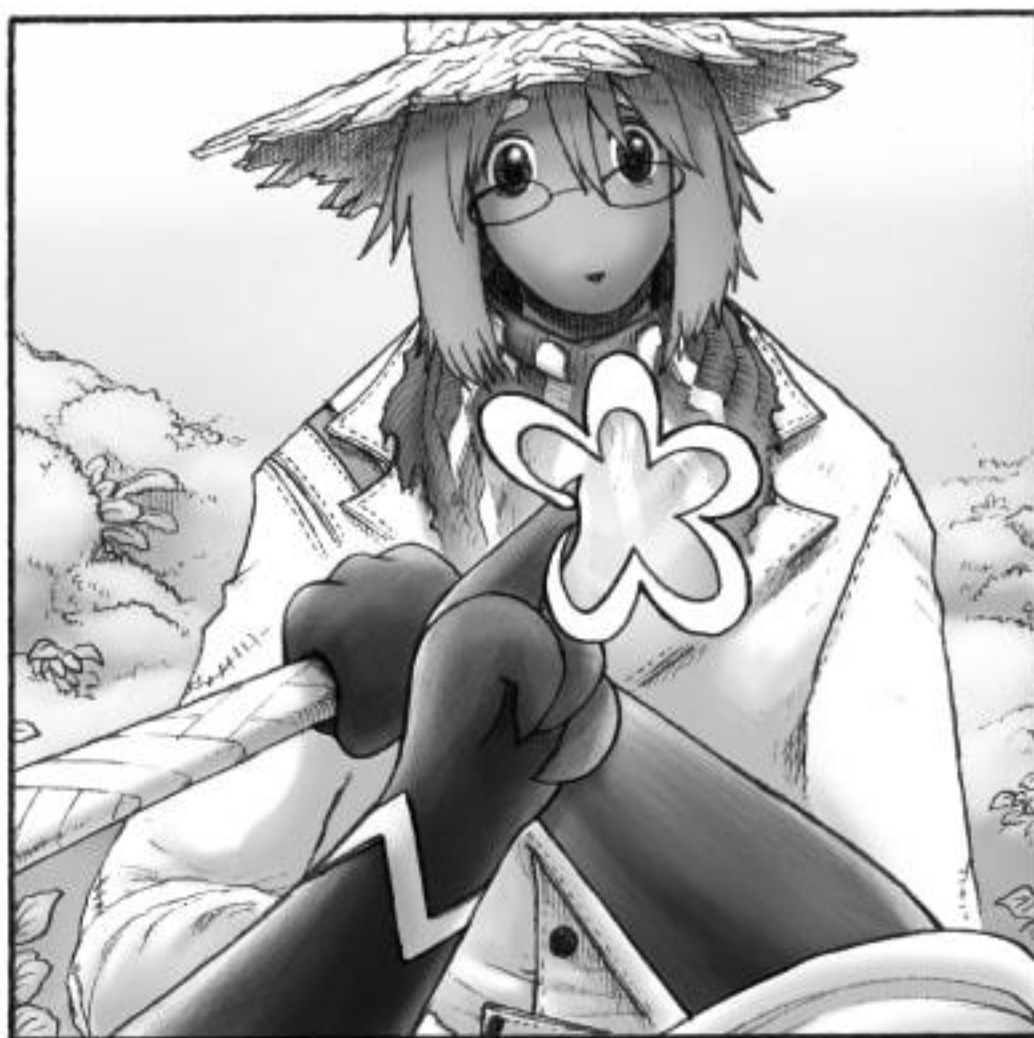

IT'S IN
THE ENCY-
CLOPEDIA.
YOU CAN
SEARCH
BY COLOR.

LET'S
SEE...

DAKINI.

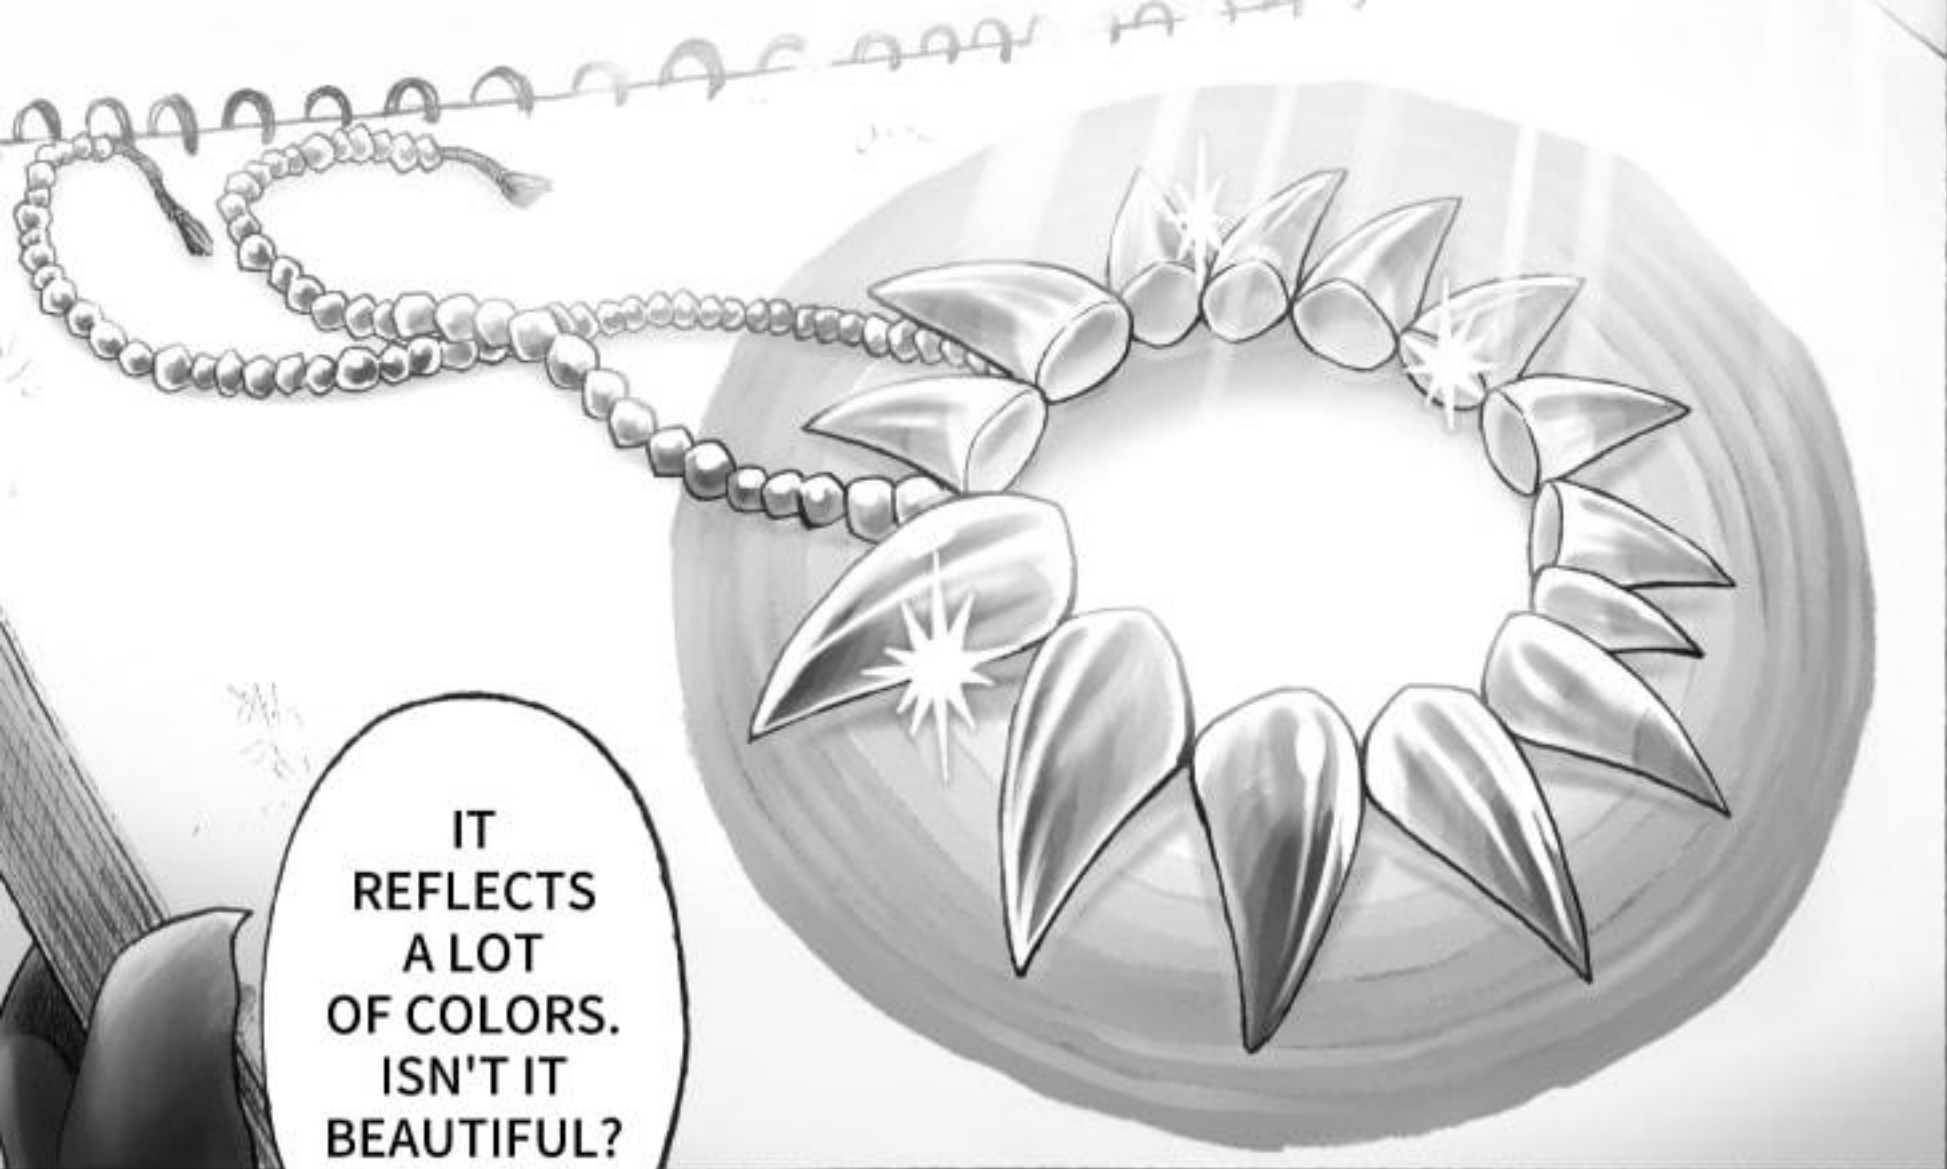

YUP,
THE ONE
WE MADE
WITH THE
GREAT
SILVER'S
FANGS.

CAN I
BORROW
YOUR
NECKLACE
FOR A
MINUTE?

LOOK
HERE.

IT
REFLECTS
A LOT
OF COLORS.
ISN'T IT
BEAUTIFUL?

...!

THIS
NECKLACE
REFLECTS
THE PLACE
WHERE
YOU ARE.

WHEN
IT SEES
FLOWERS,
IT SHINES.
JUST LIKE
YOU.

SO
YOU
SHOULD
WEAR
A LOT
OF FLOW-
ERS TO
MAKE IT
HAPPY.

I WANT
YOU TO BE
SUR-
ROUNDED
BY FLOWERS,
DAKINI.

I WANT YOU
TO WALK DOWN
A PATH
FULL OF
BEAUTIFUL
FLOWERS.

EI...!

OH, MY!
DON'T
CRY,
DAKINI.

EI...!

YOU'VE
GOT TO
SMILE
FOR YOUR
NECKLACE!

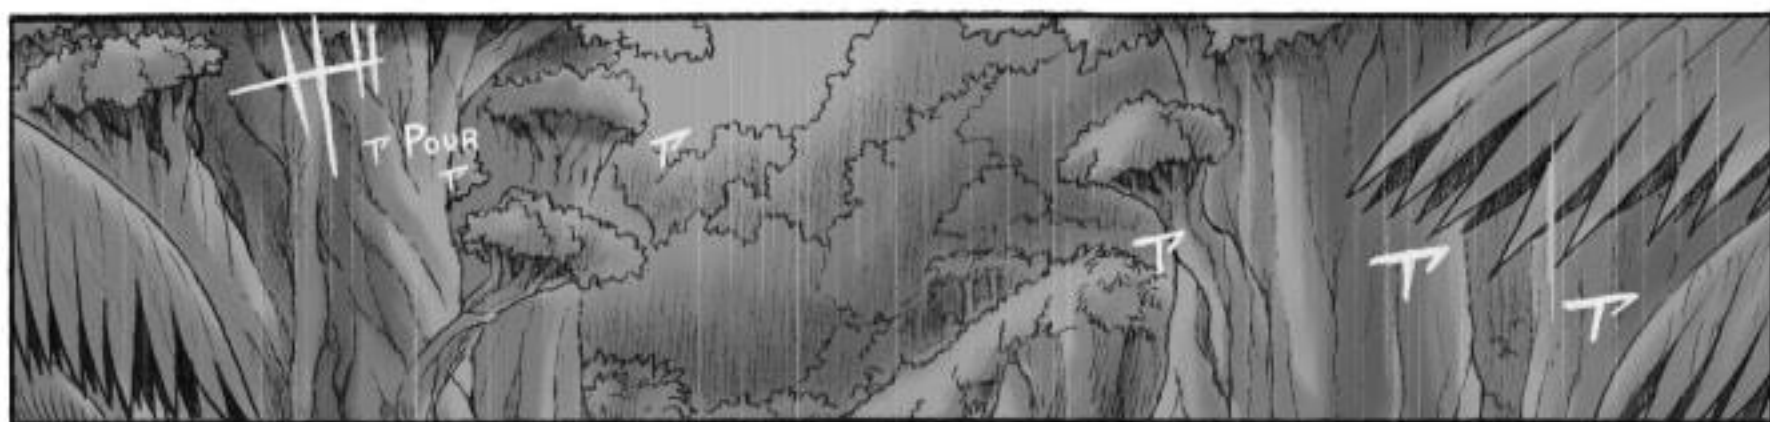

OH!

SPLISH

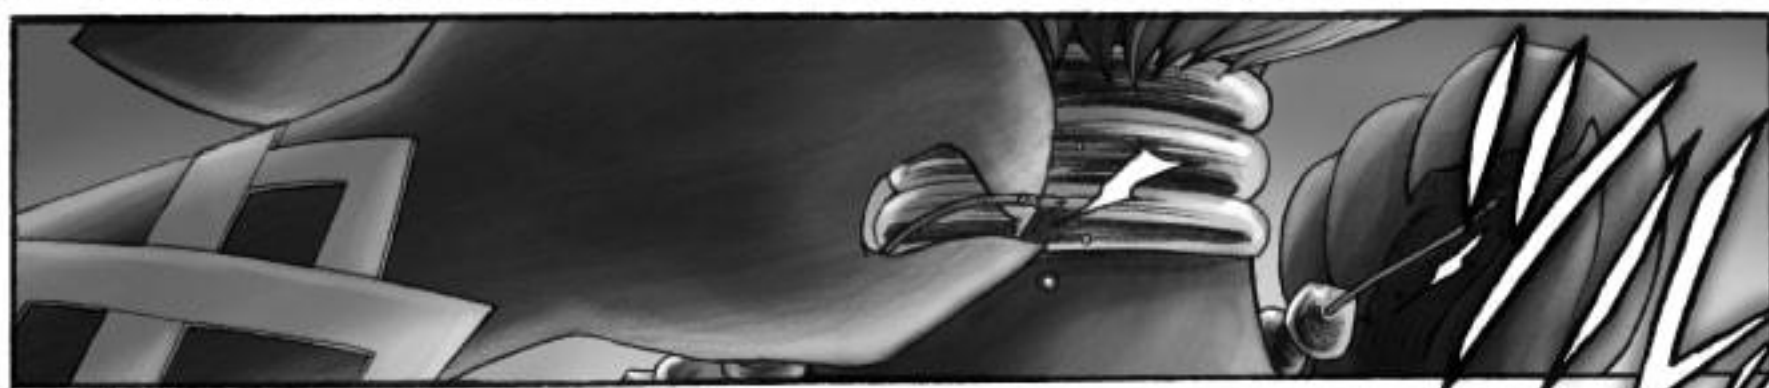

IT'S
RAINING.

DAKINI.

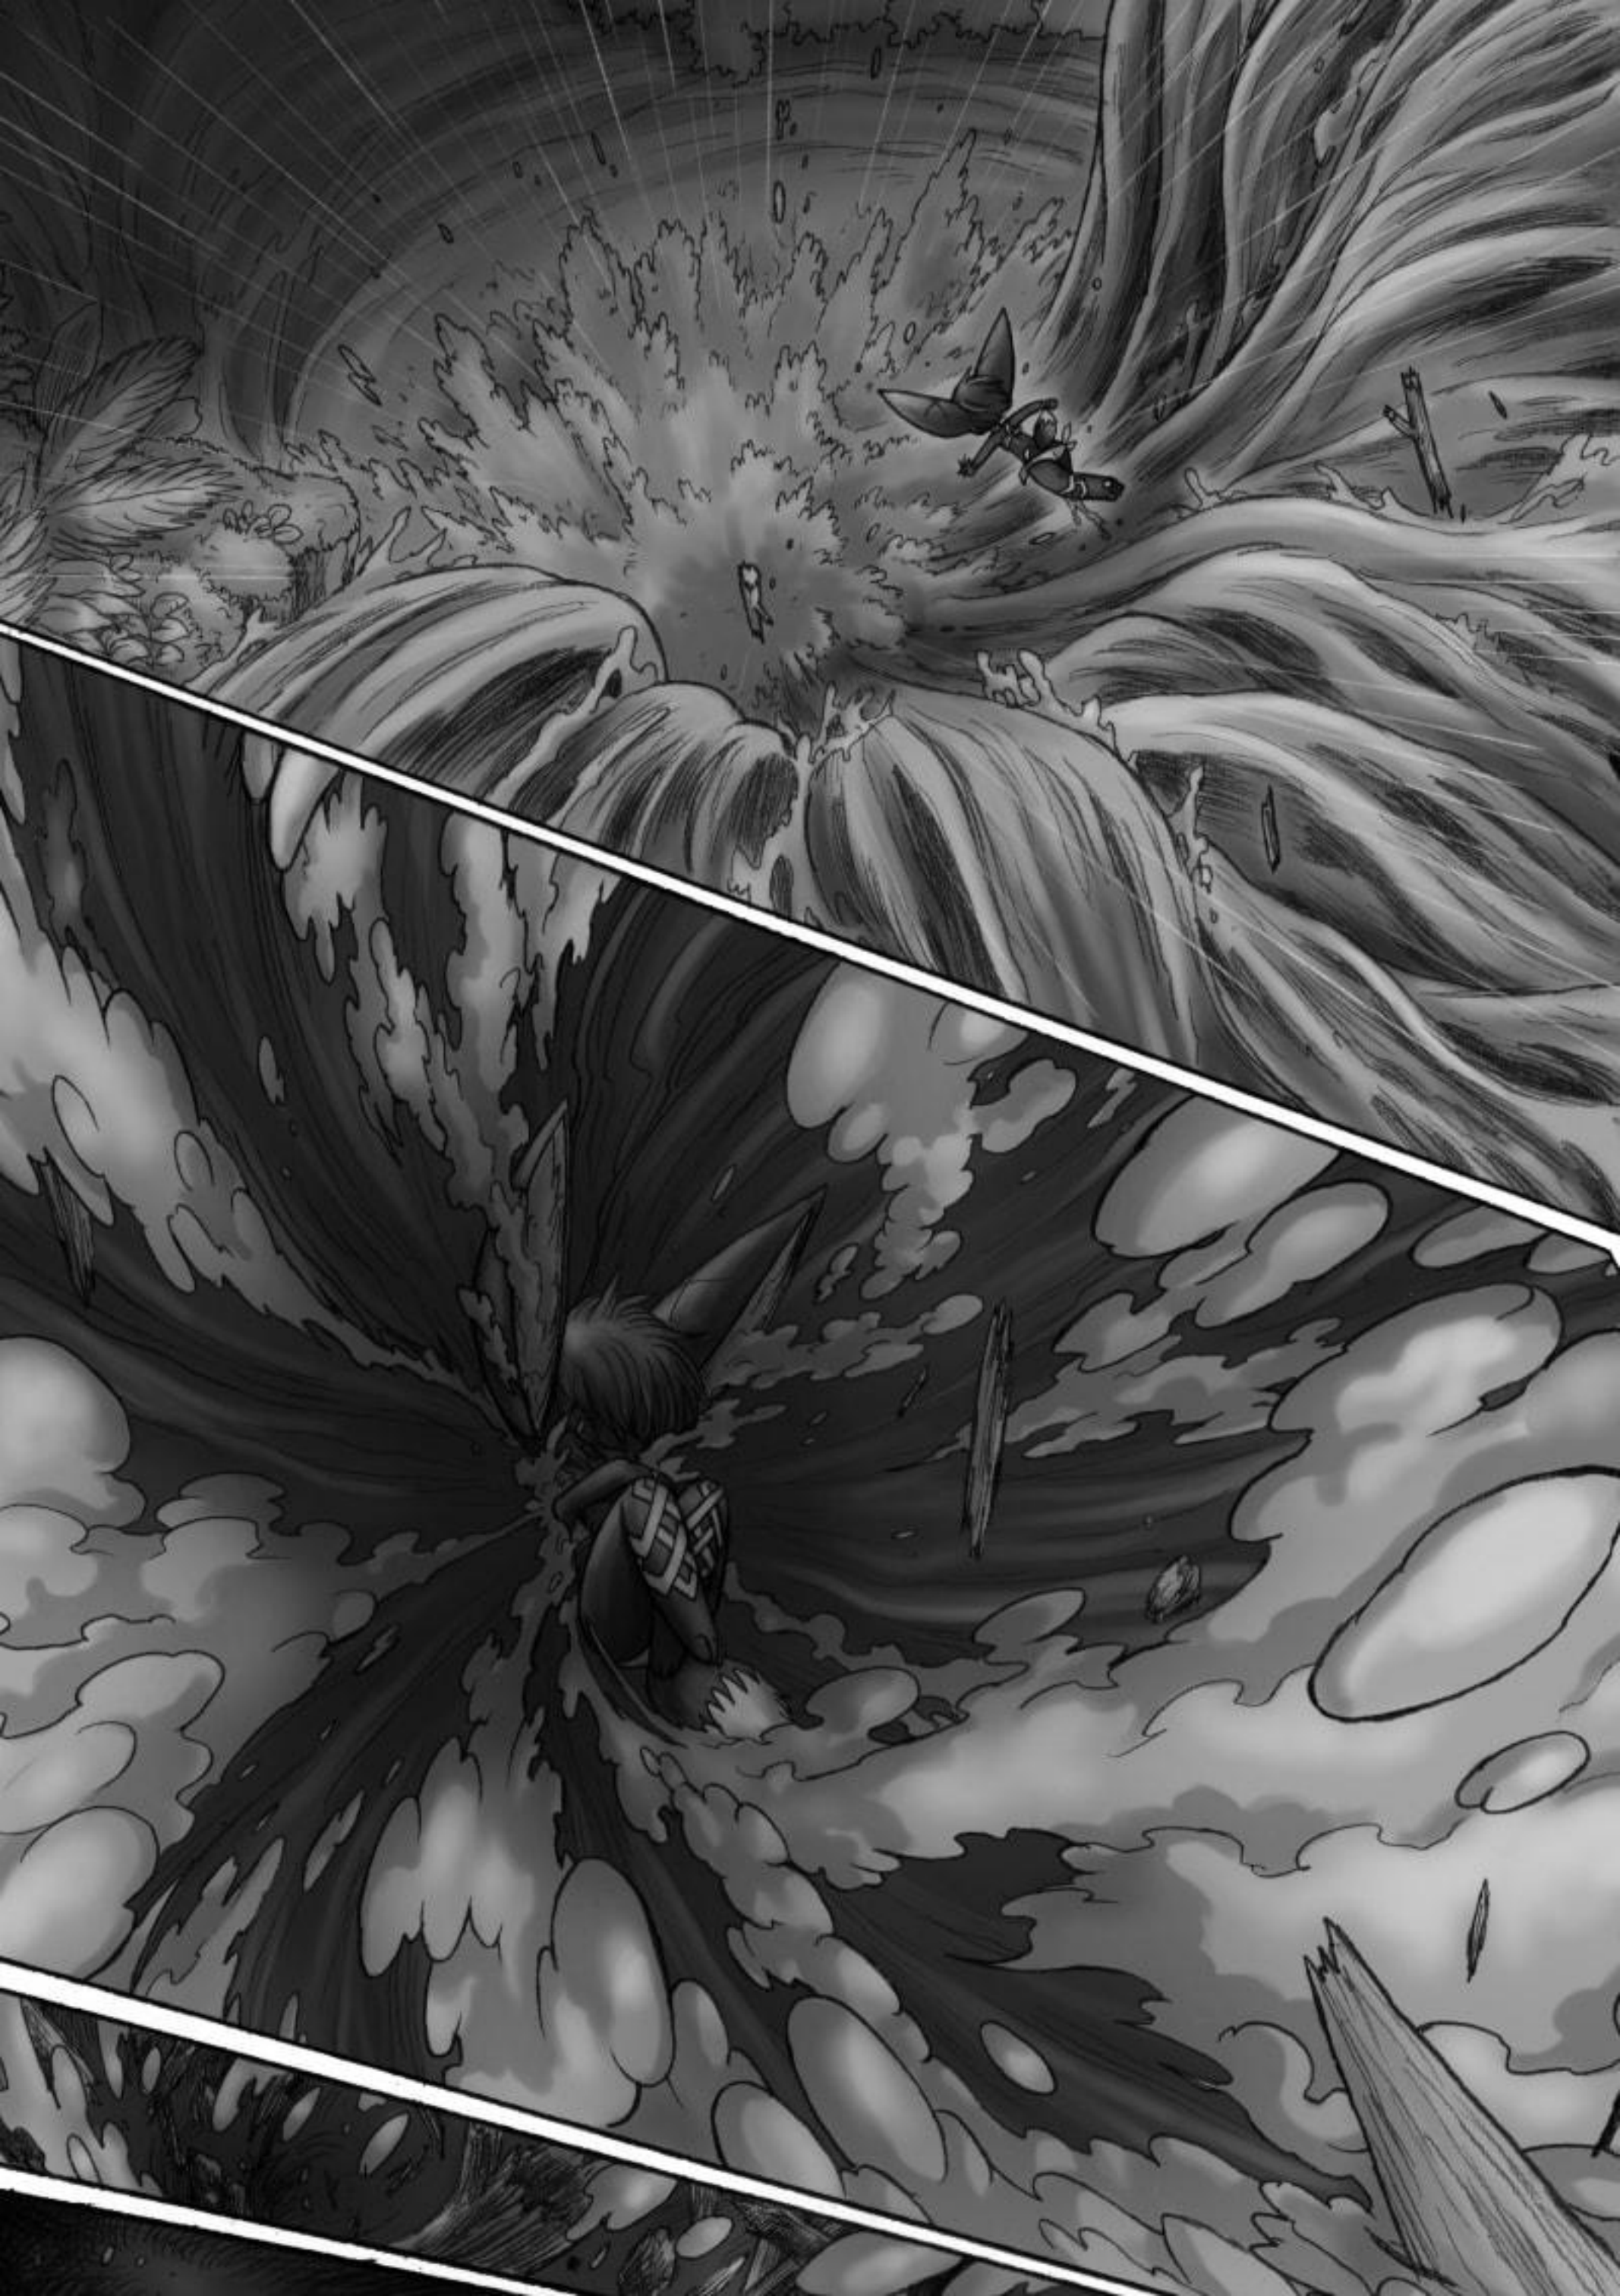

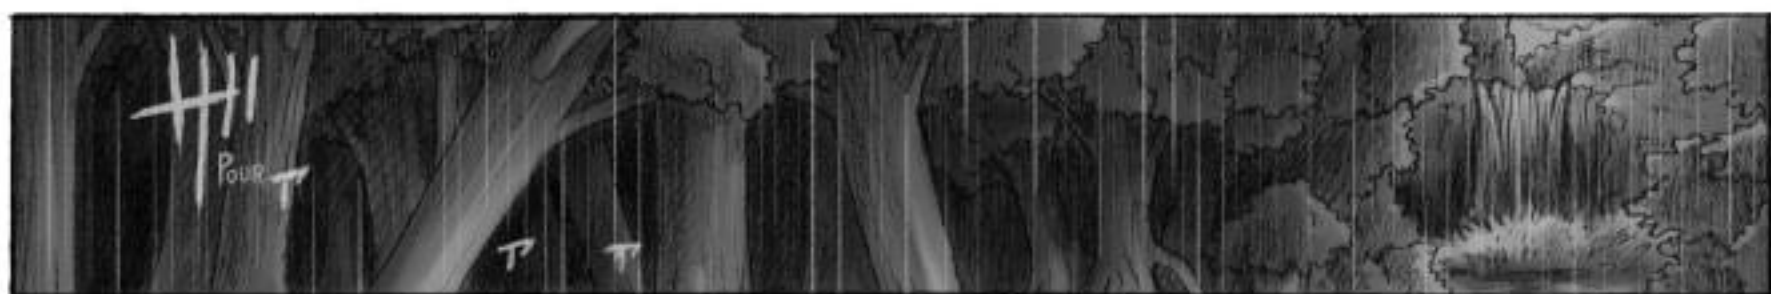

DAKINIIIIIIII!

NOW,
THIS
IS A
SURPRISE
...

WHERE
IN THE
WORLD...

...DO
YOU
GUYS
COME
FROM?

FLOWER KNIGHT DAKINI

IN CHAPTER 11**

FLOWER KNIGHT DAKINI

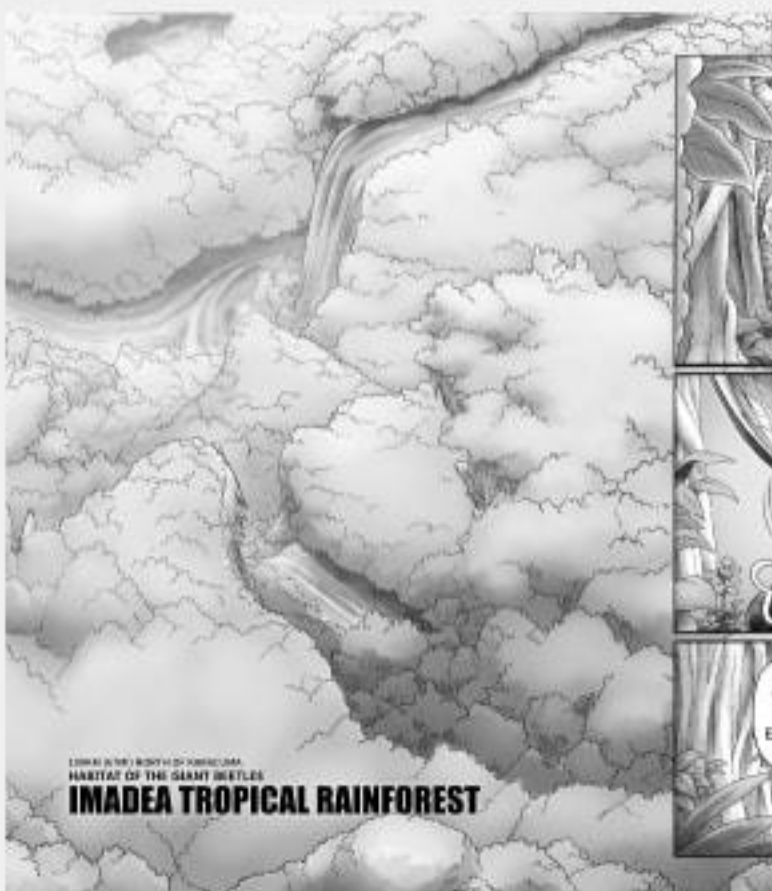

Dr. Oyunna

Archaeologist from the industrial city of Neueisen. 35 years old. She mainly collects golem remains and records. She is the eldest daughter of a family of inventors whose lineage traces back to Eisen, a city destroyed by golems in the early years of the Town Era (TE). The importance of golem-related research was not recognized until recently, with the full-scale investigation of the Pandemonium archeological site. This is because scientific scrutiny of the events surrounding the golems had not yielded any new findings. There had been remains collectors in many parts of the world since golems first appeared, but it was basically seen as a (slightly inappropriate) hobby. Dr. Oyunna has been intrigued by the magical nature of golems since she was a child, and was not bothered by the low opinion people had of her interest. Upon learning of the incident in Karacuma, she rushed to the city and began collecting samples of the remains as well as studying them.

Disaster Rescue Team

Part of the local police force. The core members, experts in the field, direct other local police force members and volunteers. Their protective gear differs from the knights' and local police force's uniforms, in that it's designed specifically for protection. Their helmets look like goldfish bowls, apparently because the design accommodates all types of individuals. These are made in the city of Bough-one and are used in various towns.

Imadea Tropical Rainforest

In this world, the area outside the cities has only a few small villages and settlements where people live (usually in groups of one tribe), but the Imadea Rainforest is paradise for the giant beetles. Various species of giant beetles, plants, and insects, from small to large, inhabit this area. The ecology of the giant beetles is also involved in the formation of the special landforms that make up this unique landscape. It is a lush and dangerous place, rarely visited by ordinary people.

Where many giant beetles live, there are also many plants that serve as raw materials for aiushi. Eiden and Dakini have set up a camp in the jungle there, and survive by using aiushi incense and spray.

Freshwater Crown Squid

A freshwater squid, like the name says. It stores water in its transparent shell, and its body surface, including the inside of the shell, can change color and shape. Its mimicry is both offensive and defensive. The flesh is tasty, but the ink tastes a bit foul and only insects like it. They feed on insects.

Fangrove

A type of mangrove. It grows in shallow rivers and brackish water. The trees are not fully rooted, so they can be moved by river currents and such. When a large giant beetle walks through a fangrove forest, it looks like the trees are walking in flocks.

Onodrim Trees

Trees that intertwine with each other to grow to tremendous size. In fact, a tree might not be entirely alive, as it appears to consist of successive layers of young trees growing as parasites on older ones. In some places, the roots of these trees themselves form the foundation of the terrain. The habitat of the giant beetle generally has very rich soil, and there are many types of large plants such as this.

Fishing-chain-armor Giant Beetle

This giant beetle lives in big rivers and lakes. It has long, sensitive antennae, a hard back, strong teeth, and multiple sickle-shaped legs growing from its abdomen. Although they're not shown here, the hind legs are fin-like, and it also has a whale-like tail fin. It's a carnivorous species, feeding on smaller giant beetles and fish. The individual shown here is of medium size, with some sea-dwelling members of the species growing to be much bigger.
